

## Heavy Light Military

**Heavy Light Military has been developed for the demanding special use of the defence forces. The suit is not fit for civil use; it functions uniquely as a working suit for professional soldiers. All black. Can be made nonmagnetic.**

Two-piece map pocket that can be covered with a flap attached to the rear thigh. Pocket for compass. Pocket for cylinder and quick coupling to the inlet valve on the thigh. Adjustable strap to keep the cylinder in its place.

Wrist seal protection. Back reinforcement, knee pads, non slip surface / reinforcement on the elbows. The telescopic waist allows persons of different height to use the same suit. Integrated suspenders and crotch strap.

Integrated loops for drying. 4 mm neoprene boots with latex surface. Allow for efficient working on land.
